2021.4.21-4.24

Call for Papers

2nd WICE, 21-24 April 2021 | Jinan City, China

The 2nd World Congress on Internal Combustion Engines (WICE) is a premier technical event dedicated to innovations in internal combustion engines. The congress serves as a major forum for leading academicians, researchers, and industry leaders to showcase their works around the theme of 'Green, Efficient, Intelligent and Reliable' . Meet colleagues and customers from global industries.

第二届世界内燃机大会

The 2nd World Congress on Internal Combustion Engines

The congress is devoted to the presentation of papers in a variety of fields related to internal combustion engines.

- Efficient and clean combustion technologies
- Emission control technologies
- New low carbon fuel combustion technologies
- Intelligent control technology of power system, structure, friction, and lubrication technologies
- Intelligent design and manufacturing of engine
- New product development of internal combustion engines
- New technologies, new materials, and new processes of engine parts
- Testing technology and methods
- New low carbon power plant
- Key technologies of special power system.

Please submit your paper to LIU Fang, liufang@csice.org.cn .

All accepted papers will be published at the 2nd WICE (report, posters, or proceedings of WICE). Excellent papers will be recommended to Journal of Central South University (ISSN 2095-2899, CN 43-1516/TB, SCI-E) and published in June 2021 in the special issue of World Congress on Internal Combustion Engines.

Review-ready paper submission deadline: *31st January 2021*
